## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see Paper #13, filed 6/23/03, with respect to the rejection(s) of claim(s) 26 and 27 under 35 USC 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Everett, Jr. (4,060,703) discovered upon a new field of search.

### ***Claim Rejections - 35 USC § 103***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 26 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over SCHEINBERG (6,030,088) in view of EVERETT, JR. (4,060,703). SCHEINBERG shows the invention substantially as claimed except for the particular light source used to illuminate the exterior optically transmissive mouse housing. EVERETT, JR. shows that it is known in the art to use a flexible electroluminescent lamp "30" to illuminate from underneath an optically transmissive material "18 and 22" of a computer keyboard for the purpose of efficient illumination of the computer control buttons, see col. 1, lines 27-30. It would have been obvious to one of ordinary skill in the art at the time of the invention to substitute the electroluminescent lamp "30" of EVERETT, JR. for the neon lamp of SCHEINBERG for the purpose of providing energy efficient lighting of the computer mouse.

Art Unit: 2875

***Allowable Subject Matter***

4. Claim 28 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
